EARTH CONSCIOUS SURFACING

The story of how a small construction company went from sealing driveways door-to-door to replacing over 650 new driveways, creating PurePave technology, distributing across USA and servicing over 4800 clients.

TAYLOR DAVIS, CEO

Hi! Thank you for taking the time to find out more about PurePave's permeable surfaces. PurePave's technology grew out of it's sister company TAC Ottawa. We founded TAC in 2012 because we knew how to provide our clients with better pavements and stronger decorative driveways. We soon became a major player in the high-end paving business and we teamed up with some really smart people along the way.

As our construction company grew, customers started asking if we could build custom granite driveways that sparkle in the sunlight and don't become ridden with weeds or warped like interlock. We took on the challenge and expanded towards our customers' demand. Many of our client's neighbours had the desire for a new type of upscale driveway, but did not want interlock or concrete... they wanted something more practical... something that was eco-friendly, beautiful and long lasting.

Frustrated with what the commercial paving market had to offer, we started to look to solve the problem ourselves... and that's when things really started to get interesting.

When Taylor Davis, PurePave CEO was flown out to Manhattan in 2016, he never thought he would see Bill Clinton and Michael Jordan golfing on our pavements just one year later!

We teamed up with Canada's top construction materials chemists to create the strongest possible porous pavements. We knew that in order to accomplish our goal, we would need to push the innovation much further than ever before. We needed to create a sprayable, UV-stable polyurethane that would allow us to forever strengthen PurePave surfaces for years to come...

Over the years, PurePave was slowly becoming a highly sought after construction product and we began sending test samples to some of the world's largest construction companies in Manhattan and New Jersey while TAC Ottawa used it to build amazing new driveways locally.

Fast forward to 2018 and our proprietary technology has been tried, tested and proven with international distributors across the USA, Canada and Korea. We can spray or mix PurePave to build the strongest and best looking eco-friendly surfaces available today! We can keep any and every porous paving surface in tip top shape using the PurePave spray-tech system and that is something we are very proud of.

With patents pending and a beautiful aggregate supply, we've expanded our Ottawa-based installation company into Toronto to install surfaces for residential and commercial clients. We're bringing 10 year warranties and a free spray system to celebrate our expansion!

We'd love to build you a new driveway, pathway, patio, pool surround, road, parking lot or landscape project! Book now 613-627-3833 info@purepave.com

“FROM DOOR-TO-DOOR TO ACROSS THE COUNTRY”

SUCCESS CAN COME AND GO, BUT INTEGRITY IS FOREVER

PurePave's installation crew, TAC Ottawa has been rewarded as an organization that holds honesty and truthfulness of character as it's core principle. As our company has grown from 2 young men to an office of over 20, we've watched our team members consistently do the right thing because it's who they are. Everyone at TAC is part of the team because they're driven to put forth their best work no matter what. When you choose to work with us, you can be 100% sure that our entire organization is operating with respect and in good faith. We believe integrity is the most valued quality anyone can have in their life. - TAC Team

WHY A PUREPAVE DRIVEWAY

PurePave technology was created by its sister company TAC Canada. They needed a way to build porous paving surfaces more economically and a way to strengthen customers driveways over time so they last forever.

Some of Canada's top polyurethane chemists joined our team and after years of testing we created the only sprayable polyurethane used in paving today. Our strength-formulas can be sprayed onto porous pavements using just a spray-canister or traditionally mixed and troweled with specialized equipment; PurePave is unlike any other paving-tech before it.

"We developed a proprietary paving process" said Davis. "Nobody else knows our recipe and that is something we are very proud of. Our goal is to make the best permeable and decorative aggregate surfaces in Canada. With our spray-tech we're able to strengthen our surfaces over time while maintaining a like-new appearance even 10-15-20 years later." -Ottawa Citizen's Newspaper interview with PurePave creator Taylor Davis, May 2017.

THE PUREPAVE DIFFERENCE

In addition to first installing a laser-graded base, we pave a much thicker overall pavement. We use high-grade, innovative materials: UV-resistant binders, recycled, rubber and other specialized compounds that help us to produce the porous driveway surfaces that we do today.

PurePave tech allows us to build the strongest eco-friendly and permeable surfaces possible.

PUREPAVE PARKING LOTS

MORE PRACTICAL PAVING ASSETS

Stronger, permeable, more natural looking pavement that never has to be replaced.

Typically used to create larger eco-friendly surfaces where permeability, longevity, storm water solutions are required.

- 1 **Eliminate need for costly drainage systems.**
- 2 **Incredibly durable for heavy load support.**
- 3 **Save money on maintenance.**

Excellent for new parking lots that don't have an existing drainage system, we can

maintain the commercial asset indefinitely and save huge sums of money on maintenance.

Unlike asphalt, PurePave is not oxidized by sunlight. The permeable surface is resistant to cracking and can be maintained as needed by applying PurePave spray and stone.

POROUS DRIVEWAYS

DESIGN / ADVANTAGES / WARRANTY

Our most famous innovation has been supplied and installed everywhere from the most exclusive golf courses in New York City and Canadian Landscape Depots all the way to your driveways all over Ottawa!

The upscale beauty of Resin-Bound Surfacing meets the practicality and strength of Permeable Paving. This uniquely beautiful pavement is a designers dream. Interlock borders, glow stones and landscape

design elements enable us to create a completely custom driveway you will love and be proud of.

Crushed granites and quartz aggregates are bound by our proprietary PurePave mixed resin and on the top by PurePave spray-tech. PurePave driveways are as practical as they are beautiful with their dual-resin system and massive 10 year ++ warranty.

POROUS PAVEMENT

ADVANTAGES / OPTIONS / DESIGN / GLOWSTONE

30 YEARS OF LAB-TESTED TECHNOLOGY:

PurePave and Addagrip Porous pavements are eco-friendly and incredibly durable.

Built with patented polyurethane resins, recycled rubbers and a high-end stones of your choosing: granite, quartz or marbles.

Eco-Friendly: Having an oil-free Porous driveway means all water runs right through and back to the water table.

BENEFITS:

- ▶ Porous / semi-porous
- ▶ Tar free pavement is eco friendly
- ▶ Extremely durable
- ▶ Maintenance free
- ▶ Design friendly
- ▶ Completely exclusive
- ▶ Anti-slip
- ▶ Can resurface asphalt or concrete

SAFETY SURFACING:

Anti-slip surfacing without ice build-up.

Melting snow will flow into the driveway, preventing ice from building up on the surface!

After constructing a porous base for the driveway, the pavement is applied to complete the surface.

PurePave driveways are unaffected by frost-thaw cycles as water is allowed to 'breathe' as water freezes and liquefies, which leads to the best longevity of all pavements in our climate.

In addition to the Castles in Europe and Jaguar dealerships in Canada, we build:

- ▶ Driveways
- ▶ National parks
- ▶ Golf course pathways
- ▶ Premium auto dealerships
- ▶ Tree Pits
- ▶ Parking lots
- ▶ Pathways / Walkways
- ▶ Glowing pathways
- ▶ Landscape Design

THE PERFECT BASE

Base construction is paramount to the success and longevity of any pavement. While TAC Pavements are more flexible than asphalt, our professional base crew ensures optimal performance and longevity by taking the following A+ approach to base construction.

For optimal stability, this granular base should exceed the width of the surface to be paved on each side.

The recommended depth of the base is 12 to 18 inches (30 to 45 cm).

New base installations will be covered with a geotextile membrane to prevent the rise of soil particles that are likely to affect the stability of the granular mixture prior to paving.

Our granular mixtures meet the MG-20 metric designation and our construction team compacts the new base layers every 4-6 inches to ensure proper stability.

HOW PAVEMENT IS PRICED

BY THE CUBED FOOT:

The longevity and performance of any Canadian pavement is highly dependent on the quality of the base. This is why TAC Canada takes base construction very seriously.

In order to offer unbeatable warranties and ensure optimal pavement longevity, TAC Canada pricing includes A+ base preparation.

Expect your quote to be evaluated based on:

- 1 Base requirements (depth + square footage)
- 2 Current surface (dirt, asphalt, gravel, existing base)
- 3 Excavation requirements (depth, dump loads, time to complete)
- 4 Your location (proximity to dump areas, suppliers and city centre)
- 5 Surface size
- 6 TAC pavement type (Natural, TAC Black, GemStone, Porous)

We regularly provide 'ballpark' quotes for clients before we see their driveway if requested. However, in order to do so, we request the following information:

Name, Address, E-mail, Phone, product of interest:

- A Approx surface size (dimensions or number of cars that fit)
- B Current surface type (dirt, asphalt, gravel, existing base)
- C Current surface condition (photos are helpful)

If you are in the market for paving and landscape design, TAC offers full service construction and design with warranties as remarkable as our products.

Book a FREE Consultation today, our season books up fast.

Thank you for learning about our business.

EXTERIOR DESIGN

INTERLOCK + PUREPAVE

PurePave surfaces are design friendly and work well with landscaping details.

ROOFING

METAL ROOFING - UNBEATABLE WARRANTY, STUNNING DESIGN OPTIONS

Great protection for your home, great for the environment.

Metal Roofs essentially last forever with longevity in the 70+ years range.

Metal Roofing is a premium product but the benefits speak for themselves!

Speak with our Roofing foreman with over 30 years experience and get a Free quote today!

SHINGLE ROOFING

PurePave's customers believe it's much better to prevent roof leaks than to fix them. Asphalt shingle roofs are the most popular choice and are also the most economical. This is why it is of utmost importance to install your new roof correctly.

We maintain consistent communication with our customers throughout every step of the construction process.

We understand that you have other things to focus on in your life. Let us take care of your Roof and enjoy the peace of mind that comes from working with a professional construction group in PurePave.

SPECIALTY SUPPLY & PRIVATE LABEL SERVICES

1- BUILD YOUR OWN POROUS PATHWAY (RESIDENTIAL)

2- PRIVATE LABEL PUREPAVE FOR YOUR COMPANY (COMMERCIAL)

We supply the materials + instructions, you put it together!

After installing an 8 inch clean-fill porous base:

1 bucket = 65-75 square feet of pathway

- 1 Pour RockLock Resin into canister
- 2 Pump Canister
- 3 Spray RockLock
- 4 Mix stones with rake for adequate coverage
- 5 Trowel flat

POROUS PAVE MATERIAL SUPPLY (COMMERCIAL)

Consulting and supply services available for Landscaping and construction entrepreneurs.

CALL TAC CANADA 613-627-3833 FOR QUALIFICATIONS AND CERTIFICATION:

- 1 Construction training
- 2 Technical education
- 3 Branding and marketing

GLOWSTONE

Supply and install glowstone pathways or glowstone for landscaping features.

"If you're looking for curb appeal then TAC Ottawa are the ones to provide it. TAC Ottawa's professional team did our driveway and I was so impressed that I had them do a patio to match at the front of the house which looks amazing. All persons driving or walking by stop to have a closer look at the driveway's fantastic look. The whole team from office, sales and production are all knowledgeable and hard working. My site was left clean from any debris or materials. I can attest that TAC Ottawa are hard working, honest and trustworthy. I highly recommend TAC Ottawa for your next driveway paving."

—Guy Giroux, Orleans Ontario
